

NOTE: ① THE DEC WAS NOTIFIED BY OUR  
Then tenant in I believe was 1994 that  
while delinering dry cleaning chemical  
Schneider truck lines spilled at the rear  
dock outside area of the building and  
Schneider people did remedy that spill.  
~~and~~ ~~Dec.~~ DEC. stated that it was OK.  
no further action was necessary.  
Schneider removed three feet of soil at  
the spill site and took it away to be  
properly processed.

② Prior to Gal- for purchasing and closing  
then owner had notified us there was a  
pending cleanup. There was an open concrete  
lined pit inside the building about 10 ft. X 40'  
I filled with sand and what happened was an  
employee of Mars Industries the owner at  
the time before Gal- for had spilled oil I believe  
into the pit full of sand. The DEC. monitored  
the clean up and was present during the  
removal of 3-4 TRUCK LOADS OF THE  
SOIL from the pit and DEC. signed off.
